

Cow Health Protocol

NDSU Dickinson Research Extension Center

Annually vaccinated for:

Infectious bovine rhinotracheitis (IBR) virus
Bovine viral Diarrhea (BVD) Types 1 and 2
Parainfluenza 3 (PI3) virus
Campylobacteriosis (vibriosis)
Leptospirosis (five Leptospira serovars)

The herd is annually screened for:

Persistently infected BVDV
Johne's disease
Evidence of eye or other health abnormalities
Spot testing for bovine leukemia virus.

(In addition to annual scours vaccination and individual vaccinations received as a calf.)
