

## **North Dakota Beef Cattle Improvement Association**

# **Founding Principles**

- Advance the use of practical and scientifically proven information for beef cattle improvement by encouraging research and education related to the total advancement of beef cattle production
- Encourage and coordinate herd improvement programs on the farm or ranch
- Encourage and/or provide opportunities for recognition of superior beef type and conformation
- Provide guidance and supervision of market and breeding animal evaluation programs in cooperation with breed associations
- Assist in processing and evaluating records obtained in a herd improvement program
- Promote and advertise superior stock based on accurate records
- Become affiliated with the American Beef Cattle Performance Registry Association, thereby, joining hands with sister state associations in the standardization of procedure in the measurement of the performance of beef cattle, also the recognition of cattle with outstanding productivity
