

GRADUATE STUDENT POSITIONS (M.S or Ph.D.) AVAILABLE IN INVASIVE SPECIES ECOLOGY, DEPARTMENT OF NATURAL RESOURCE ECOLOGY & MANAGEMENT, OKLAHOMA STATE UNIVERSITY, STILLWATER, OK. Two graduate student positions are available for individuals interested in studying positive vs. negative plant-soil feedbacks related to biogeochemistry, soil microbial ecology, plant establishment processes, or restoration of rangeland ecosystems. Research projects will focus on the predominant invasive species in the Southern and Central Great Plains (e.g. salt cedar, Old World Bluestems, sericea lespedeza, or tall fescue).

Tentative starting date: June 1, 2009.

In addition to stipend, benefits include tuition waiver (up to 6 hours per semester).

Interested applicants are encouraged to send a letter stating your interest in the program and a resume to either:

Dr. Gail Wilson
gail.wilson@okstate.edu
405-744-5539

Or

Dr. Karen Hickman
karen.hickman@okstate.edu
