

North Dakota Tree Selector

General

Scientific Name: *Cornus racemosa*

Family: Cornaceae
(Dogwood)

Hardiness: Zone 3

Leaves: Deciduous

Plant Type: Shrub

Growth

Rate: Medium

Mature Height: >7'

Longevity: Medium

Power Line: Yes

Ornamental

Flowers: White

Fruit: White

Fall Color: Purple

Gray Dogwood

Description

A densely branched shrub (or small tree form) native to North America as far west as eastern North and South Dakota. Very attractive shrub in flower for public and private landscapes. Tree form has potential as small tree in sites where restricted height is needed.

Preferences

Light: Full sun to part shade.

Water: Medium.

Soil: Tolerates a wide variety of soils.

Comments

Very tolerant of city pollution. Foliage turns an interesting (but not always showy) dusky purplish red in fall. Terminal stems holding the flowers are distinctively red and provide interesting contrast to the clusters of small white berries which form after the flowers have dropped. Red twig color at the end of branches is more easily seen after the fruits are gone, and red color often persists into early winter.
