NS = no statistical difference between varieties.

Planting Date: May 6

Harvest Date: August 22

Seeding Rate: 750,000 live seeds / acre (approx. 1.4 bu/A).

Previous Crop: 2008 = sunflower, 2009 & 2010 = HRSW.

Note: The 2011 trial sustained heat stress and a moderate infection of barley yellow dwarf causing lower test weights and grain yields.
