

Add Fiber to Your Diet

Having more fiber in your diet helps lower blood cholesterol and prevents constipation, and may help prevent cancer. Many people shortchange themselves on the 20 to 35 grams per day fiber recommendation. The average American consumes 10 to 15 grams of fiber per day.

Circle the foods that are fiber-rich, then put a star (☆) by the foods you will add to your diet.

- Whole-wheat bread
- Sugar
- Broccoli

- Potato chips
