Total				17.0	44,154				15.1	11,818

^a Acres infested was obtained by multiplying weed frequency by crop acres which was 9.8 million (m) for HRS wheat and 2.5 m for barley in 1978 and 9.9 m for HRS wheat and 1.7 m for barley.

^b Percent yield loss caused by weed competition was based on weed density and competition data from the literature as follows: green and yellow foxtail (assumed similar), wild oat, wild mustard, and wild buckwheat (Nalewaja 1972), field bindweed (Gigax 1978), and Canada thistle (Hodgson 1968). Total % yield loss is based on all acres.

^c Grain loss based on average North Dakota production of 29.8 bu/A for HRS wheat and 46 bu/A for barley in 1978 and 26.3 bu/A for HRS wheat and 46 bu/A for barley in 1979. Losses from weed competition in barley were only available for wild oat where loss in barley was about 25% less than in HRS wheat for wild oat plants (Bell and Nalewaja 1968). The losses in barley from all weeds were assumed at 25% less than in HRS wheat.

Total			28.1	115,430				21.4	352,638	

^a Acres infested was obtained by multiplying weed frequency by crop acres which was 6.4 million for HRS wheat, 2.9 m for durum wheat, 1.8 m for barley, and 1.25 m for canola in 2000 (NDAS 2002).

^b Percent yield loss caused by weed competition was based on weed density and competition data from the literature: HRS wheat, durum wheat and barley: green and yellow foxtail (assumed similar), wild oat, wild mustard, and wild buckwheat (Nalewaja 1972), kochia (Dahl 1984), Canada thistle and perennial sowthistle (perennial sowthistle assumed 50% less than Canada thistle) (Donald 1990, Hodgson 1968), field bindweed (Gigax 1978), common milkweed (Yenish et al. 1997), and common sunflower, common ragweed, common cocklebur (assumed similar) (Gillespie 1982).

Canola: wild oat, Canada thistle, quackgrass, perennial sowthistle, and volunteer cereal (Canola Grower Manual). Total % yield loss is based on all acres.

^c Grain loss based on average North Dakota production of 36.5 bu/A for HRS wheat, 27 bu/A for durum wheat, 55 bu/A for barley, and 1,320 lbs/A for canola in 2000 (NDAS 2002). Losses from weed competition in barley were only available for wild oat where loss in barley was about 25% less than in HRS wheat for wild oat plants (Bell and Nalewaja 1968). The losses in barley from all weeds were assumed at 25% less than in HRS wheat.

Total			41.7	31,692					36.8	642,328

^a Acres infested was obtained by multiplying weed frequency by crop acres which was 1.85 million for soybean, 0.525 m for dry beans, and 1.27 m for sunflower in 2000 (NDAS 2002).

^b Percent yield loss caused by weed competition was based on weed density and competition data from the literature: Soybean and dry beans (assume equal yield reduction even though dry beans are less competitive than soybean and would result in a greater % yield loss): green and yellow foxtail (assume similar), wild oat, volunteer cereal (assume similar), pigweed, common ragweed (assume similar), wild mustard, volunteer canola (assume similar), common cocklebur (Stoller et al. 1987), common lambsquarters (Crook and Renner 1990), biennial wormwood (Nelson 1992), sunflower (Auwater 1978), nightshade (Blackshaw 1991), quackgrass (Young et al. 1982).

Sunflower: green and yellow foxtail (assume similar), wild oat, volunteer cereals (assume similar), wild mustard, volunteer canola (assume similar), kochia (Blamey et al. 1997). Total % yield loss is based on all acres.

^c Grain loss based on average North Dakota production of 43 bu/A for soybean, 1,450 lbs/A for dry beans, and 1,374 lbs/A for sunflower in 2000 (NDAS 2002).

Common and Scientific Names of weeds which occurred in the 2000 survey.

Source: WSSA Composite Weeds List

<u>Common Name</u>	<u>Scientific Name</u>	<u>Common Name</u>	<u>Scientific Name</u>
Alfalfa	<i>Medicago sativa</i> L.	Milkweed, common	<i>Asclepias syriaca</i> L.
Barley, foxtail	<i>Hordeum jubatum</i> L.	Millet, wild-proso	<i>Panicum miliaceum</i> L.
Barnyardgrass	<i>Echinochloa crus-galli</i> (L.) Beauv	Mustard, tansy	<i>Descurainia pinnata</i>
Bindweed, field	<i>Convolvulus arvensis</i> L.	Mustard, wild	<i>Brassica kaber</i> (DC) LC Wheeler
Bindweed, hedge	<i>Calyptegia sepium</i> L.	Nightshade, cutleaf	<i>Solanum triflorum</i> Nutt.
Brome, downy	<i>Bromus tectorum</i> L.	Nightshade, eastern black	<i>Solanum ptycanthum</i> Dun.
Brome, smooth	<i>Bromus inermis</i> Leyss.	Nightshade, hairy	<i>Solanum sarachoides</i> Sendtner.
Buckwheat, wild	<i>Polygonum convolvulus</i> L.	Nutsedge, yellow	<i>Cyperus esculentus</i> L.
Buffalobur	<i>Solanum rostratum</i> Dun.	Oat, wild	<i>Avena fatua</i> L.
Canola	<i>Brassica napus</i> L.	Pennycress, field	<i>Thlaspi arvense</i> L.
Catchfly, nightflowering	<i>Silene noctiflora</i> L.	Pepperweed, greenflower	<i>Lepidium densiflorum</i> Schrad.
Cereal, volunteer		Pigweed, species	
Barley	<i>Hordeum vulgare</i> L.	Amaranth, powell	<i>Amaranthus blitoides</i> S. Wats.
Durum wheat	<i>Triticum aestivum</i> Desf.	Pigweed, prostrate	<i>Amaranthus powelli</i> S. Wats.
Oat, tame	<i>Avena sativa</i> L.	Pigweed, redroot	<i>Amaranthus retroflexus</i> L.
HRS wheat	<i>Triticum aestivum</i> L.	Pigweed, tumble	<i>Amaranthus albus</i> L.
Chamomile, false	<i>Matricaria maritima</i> L.	Purslane, common	<i>Portulaca oleracea</i> L.
Chickweed, common	<i>Stellaria media</i> (L.) Cyrillo	Quackgrass	<i>Elytrigia repens</i> (L.) Neyski.
Cocklebur, common	<i>Xanthium pensylvanicum</i> Wallr.	Ragweed, common	<i>Ambrosia artemisiifolia</i> L.
Corn	<i>Zea mays</i> L.	Ragweed, giant	<i>Ambrosia trifida</i> L.
Dandelion	<i>Taraxacum officinale</i> Weber	Rose, prairie wild	<i>Rosa arkansana</i> Porter
Dock, curly	<i>Rumex crispus</i> L.	Safflower	<i>Carthamus tinctorius</i> L.
Dry bean	<i>Phaseolus vulgaris</i> L.	Sage, lanceleaf	<i>Salvia reflexa</i> Hornem.
Candelabra, fairy	<i>Androsace occidentalis</i> Pursh.	Sandbur, field	<i>Cenchrus incertus</i> M.A. Curtis.
Falseflax, smallseed	<i>Camelina microcarpa</i> Andrz. DC.	Shepherd's-purse	<i>Capella bursa-pastoris</i> (L.) Medic.
Field pea	<i>Pisum sativum</i> L.	Smartweed, annual	
		Ladysthumb	<i>Polygonum persicaria</i> L.
		Smartweed, Pennsylvania	<i>Polygonum pensylvanicum</i> L.
Flax	<i>Linum usitatissimum</i> L.	Sowthistle, perennial	<i>Sonchus arvensis</i> L.
Flixweed	<i>Descurainia sophia</i> (L.) Webb.	Soybean	<i>Glycine max</i> (L.) Merr.
Foxtail, giant	<i>Setaria faberii</i> Herrm.	Speedwell, purslane	<i>Veronica peregrina</i> L.
Foxtail, green	<i>Setaria viridis</i> (L.) Beauv.	Spurge, leafy	<i>Euphoria esula</i> L.
Foxtail, yellow	<i>Setaria lutescens</i> (Weigel) Hubb.	Sunflower, common	<i>Helianthus annuus</i> L.
Horsetail	<i>Equisetum arvense</i> L.	Sweetclover species	<i>Melilotus alba</i> Medicus
		Sweetclover, white	<i>Melilotus officinalis</i> (L.) Lam.
Horseweed	<i>Conyza canadensis</i> (L.) Cronq.	Sweetclover, yellow	<i>Cirsium arvense</i> (L.) Scop.
Knotweed, erect	<i>Polygonum erectum</i> L.	Thistle, Canada	<i>Salsola kali</i> L.
Kochia	<i>Kochia scoparia</i> (L.) Schrod.	Thistle, Russian	<i>Vicia americana</i> Muhl.
Lambsquarters, common	<i>Chenopodium album</i> L.	Vetch, wild	<i>Amaranthus tuberculatus</i> (Moq.)
Lentil	<i>Lens culinaris</i> Medik.	Waterhemp, tall	<i>Agropyron smithii</i> Rydb.
Lettuce, prickly	<i>Lactuca serriola</i> L.	Wheatgrass, western	
		Whitlowwort species	<i>Draba mircantha</i> Nutt.
Mallow, common	<i>Malva neglecta</i> Wallr.	Whitlowwort, white	<i>Draba nemorosa</i> L.
Mallow, venice	<i>Hibiscus trionum</i> L.	Whitlowwort, yellow	<i>Panicum capillare</i> L.
Marshelder	<i>Iva xanthifolia</i> Nutt.	Witchgrass	<i>Oxalis stricta</i> L.
		Woodsorrel, yellow	<i>Artemisia biennis</i> L.
		Wormwood, biennial
