NOTE:
1. This Dimension To Be Determined After Structure Has Been Welded Together To insure Proper Fit.
2. Feeder Designed To Accept 7" Dia. Bales -- If Smaller Bales Are To Be Fed, The 8" Dimension Should Be Reduced To Bale Diameter Plus 12".
3. To Prevent Feeder From Overturning In High Winds, Fasten Securely To Ground.
4. If Feeder Is To Be Used On Soft Or Spongy Soil, The Runners Should Be Made From 4" Dia. Pipe.
