FABRICATION OF INTERIOR PARTITION OR END UNITS

**Step 1**
- 2x6 members on edge
- 1/2" gap
- 2x6, 2x8, and 2x8 members flat
- Blocking to put the top of all members flush

**Step 2**
- 3/4" exterior-type plywood (Ext-OFFA) partition nail with 8 penny 6" O.C. into all 2x6 members on edge. Nail lightly into other members.
- For use as an endwall add 2x8's to the legs and cut blocking in between studs at plywood edges.
- 1x8 filler below the plywood

**Step 3**
- 2x4, nail with 16 penny into stud
- 2x4, 2x6, and 2x8 members flat
- Hidden lines are not shown

**Step 4**
- 1/2" exterior-type plywood (Ext-OFFA) nuggets. Nail with 20 penny 6" O.C. in each of three signs in each member. See cross section detail.
- Apply and nail gusset to opposite face after the assembly is raised and in position.
- Hidden lines are not shown.
