POULTRY HOUSE
100 HEN CAPACITY

Note: Ventilation system can be built using stack as shown in large drawing or mullin frames can be used as shown in small drawing at left. The mullin frames are base of tall window. This makes it possible to place a window screen in place at mullin frames in cold weather. Nest box is used in this system of ventilation.

Floor slope 1'-6" to drain

Reinforcing Rods

Air Intake 6" Drain

Shingle Roof or ready-roofing

Straw

Loft

Covered with paper and lapping siding

Design by Dept. of Poultry Husbandry - C. R. Bantu
