Assistant or Associate Professor, Department of Economics, Iowa State University

- Q2 – Renewable Resources and Conservation
- Q3 – Nonrenewable Resources and Conservation
- Q5 – Environmental Economics

The Department of Economics at Iowa State University seeks to hire a tenure-track Assistant Professor or tenured Associate Professor in Natural Resource and Environmental Economics. The successful applicant will be expected to develop, or maintain, a strong research program in the field. A portion of the research activities will focus on bioenergy and biorenewables with the expectation of the development of a national reputation in this area. The successful applicant will be expected to publish regularly in top economics journals, provide high quality teaching at the undergraduate and graduate levels, and supervise graduate student research. Successful applicants will also be expected to seek: 1) productive interaction with researchers in other pertinent disciplines on and off campus; 2) engagement with individuals in industry and government, either directly or through established research entities such as the Bioeconomy Institute, the Center for Agricultural and Rural Development, and the Biobased Industry Center; and 3) external grant and contract funding.

Qualifications for Assistant Professor:
- Required: Ph.D. in Economics, Agricultural Economics, or related field.
- Preferred: Potential for superior achievement in research. Teaching experience.

Qualifications for Associate Professor:
- Required: Ph.D. in Economics, Agricultural Economics, or related field, and a demonstrated record of accomplishments in teaching and scholarship, including an outstanding publication record.
- Preferred: Publications in leading peer-reviewed journals. Demonstrated teaching excellence. Record of success in grant and contract funding.
