Animal Sciences Seminar
Speaker: Sajin Bae, Graduate Student  
NDSU Animal Sciences

Topic: Maternal Methyl Diet and Epigenetic Modification of Mammary Development in Offspring

Date: Friday, February 4, 2011
Time: 3:00 - 4:00 p.m.
Location: Hultz Hall Room 104

Ms. Sajin Bae is originally from South Korea. She graduated from Yonsei University in South Korea in May 2009 with a B.S in Biotechnology. She first came to NDSU as a one-year exchange student from Fall Semester 2008 to Spring Semester 2009. She returned to NDSU in August 2010 to work toward her M.S. degree, majoring in nutritional physiology. Sajin’s research interests are in dietary methyl nutrients and epigenetic modification. She is currently working under the direction of Dr. Chung Park.

Note to Advisors: Undergraduate spring graduation applications are due on Friday, February 4.
