Week of October 30, 2011

Animal Sciences Graduate Seminar – Kendall Swanson, Coordinator
Speaker: Ashley Lepper

Topic: Effects of Postmortem Aging on Palatability of Beef Short Loins

Date: Friday, November 4, 2011

Time: 3:00PM – 4:00 PM

Location: Hultz Hall 104

Ashley Lepper grew up in Genoa, Ohio, where she lived on a small hobby farm of 100 rabbits and county fair market lambs. She earned her B.S. in Agriculture from Ohio State University. She is currently working on her Ph.D. under the advisement of Dr. Eric Berg. Her main research interest is meat quality and sensory attributes of meat. She is also coordinator of an 8-member trained sensory panel and an active member of the BBQ Boot Camp team.

Visiting Scientist Rodrigo Goulart

Rodrigo Goulart began his participation in the Animal Science Department on October 15.

Rodrigo grew up in Ipameri, Goias, Brazil. He received his DVM from the Federal University of Uberlândia in January of 2004. In 2006, Rodrigo received a M.S. degree in Animal Sciences (Beef Cattle Nutrition emphasis) from the University of Sao Paulo, Luiz de Queiroz Agricultural Superior School. In 2010, Rodrigo received his Ph.D. in Animal Sciences (Beef Cattle Nutrition emphasis) from the University of Sao Paulo, Luiz de Queiroz Agricultural Superior School.

After the completion of his Ph.D. Rodrigo started working in the Animal Nutrition Laboratory at the University of Sao Paulo assisting with research projects in the area of feedlot nutrition. Rodrigo worked there until August of 2011 when he started to prepare to come to the NDSU Animal Sciences Department.

For fun, Rodrigo enjoys playing football, horseback riding, and spending time with friends.

Rodrigo’s office is Hultz Hall 123, his phone number is 701-231-7640, and his email is rodrigosilva.goulart@ndsu.edu.

Avoid Copyright Infringement with CC Licensed Music – Bob Bertsch, Let’s Communicate, NDSU Ag Communication

Using copyrighted music in videos can get you into legal trouble. You may think, because you are using the music for an educational or non-commercial purpose, you are not violating the copyright of a piece of music licensed as “All Rights Reserved,” but you probably are.

You can simplify the tangled web of copyright infringement by using music (and other works) licensed as “Some Rights Reserved” under a Creative Commons license. Creative Commons licenses allow creators to be clear about how their works can be used without permission.

If you are looking for music to add to a video, you can find royalty-free, Creative-Commons licensed music in a number of places. I like to use Jamendo. Most of the tracks on Jamendo can be used how ever you would like as long as you include attribution of the song and artist, use it non-commercially and share whatever you create with the music under a Creative Commons license.

Other sources for royalty-free, Creative-Commons licensed music are ccMixter and the Internet Archive. It’s a little easier to search for and find music on Jamendo than on the other two sites, but all three are great resources.
