Embryo Transfer Laboratory Technician
ReproLogix™ – Fort Scott, KS

ReproLogix™ is a rapidly growing bovine, equine and small ruminant reproduction company headquartered in Fort Scott, KS. We provide advanced reproductive technologies to proliferate elite animal genetics. Built on a foundation of integrity, ReproLogix™ provides cutting-edge technologies and the best customer service in the industry.

ReproLogix™ is currently seeking an experienced Embryo Transfer Laboratory Technician to join our team of experienced embryologists. This is a unique opportunity to be a key member of a team that performs embryology services for cattle, horses, deer, sheep and goats. Our facility in Fort Scott, KS features a brand new, state-of-the-art laboratory for embryo processing. Our fully equipped mobile laboratory and private company jet also allow us to travel directly to our clients.

Responsibilities:
• Search for and evaluate embryos post-flush
• Prepare embryos for direct transfer and cryopreservation
• Thaw and prepare semen for laparoscopic insemination
• Assist with insemination and embryo collection
• Complete and maintain accurate insemination and embryo flush, freeze and transfer reports
• Maintain laboratory supplies and equipment
• Effectively communicate with multiple team members and/or clients
• Adhere to established standard operating procedures
• Report errors immediately
• Maintain a professional image at all times
• Other tasks as assigned by supervisor

Requirements:
• Bachelor’s degree in a related science
• 1 year minimum experience grading and processing embryos for freezing and transfer
• Valid driver’s license
• Working knowledge of safe animal handling
• Excellent written and verbal communication skills
• Strong attention to detail
• Excellent organizational skills
• Fundamental computer skills (email, MS Word, MS Excel, etc.)
• Ability to sit for extended periods of time
• Willingness to perform work even in adverse weather conditions

This full-time, salaried position is available immediately. There will be a required 4 to 6-week training and observation period following job acceptance. During this time, the candidate will receive extensive training in our specific laboratory procedures and will be evaluated for his/her compatibility with our team. Salary will be commensurate with experience and benefit eligibility will be determined following completion of the training period. Because of the nature of embryology work with animals, this is not a 9 to 5 job. Early mornings and late evenings will be required at times. While some travel is expected with this position, it is our goal to have our embryology team home every evening.

This is an excellent opportunity to be part of a new and quickly growing company. To apply, please send resume and cover letter with the subject “ET Lab Technician” to info@reprologix.com.
