Mixed Animal Veterinarian  
Fort Scott Veterinary Center – Fort Scott, KS

Fort Scott Veterinary Center (FSVC) is a newly established but quickly growing mixed animal practice serving Fort Scott, Kansas, and the surrounding areas. Our clinic was established to bring the latest in veterinary advancements and outstanding customer service to southeast Kansas. We pride ourselves on taking the time to carefully listen to each client so that we can provide the most appropriate care for their animals.

We are currently assembling a team of exceptional veterinarians to meet the demands of our growing clientele. As such, this is a rare opportunity to help build a successful practice from the ground up. Our clinic boasts brand new facilities including a surgical suite, in-house laboratory, small animal exam rooms and large animal handling facilities specially designed with user and animal safety in mind. We are also fully equipped to handle in-field calls whenever they arise.

Additionally, FSVC has a unique connection with ReproLogix™, a cattle, horse, sheep, deer and goat reproduction center located near our clinic. If interested, our veterinarians have the opportunity to receive advanced training to assist with embryology work on a variety of species. For experienced veterinarian embryologists, opportunities exist currently to join the embryology team at ReproLogix™ full-time.

Job Responsibilities:

- Examine, diagnose and treat companion and farm animals
- Perform routine preventative care for companion and farm animals
- Provide in-field emergency care for livestock
- Administer anesthesia, perform surgery and monitor animals during surgery and recovery
- Collect and examine body tissues, feces, blood, urine, etc.
- Operate medical equipment (x-ray, sonography, microscope, etc.) and interpret findings
- Humanely and compassionately euthanize animals when necessary
- Provide after-hours emergency services on a rotating schedule
- Educate clients on importance of preventative care
- Cultivate strong relationships with customers
- Effectively communicate with multiple team members and clients
- Maintain detailed and accurate patient records, documentation, etc.
- Represent FSVC at community events
- Maintain a professional image and uphold the Veterinary Code of Ethics at all times
Minimum Requirements:

- Doctorate of Veterinary Medicine degree
- Licensure in necessary states or ability to acquire license
- Valid driver’s license
- Ability to safely and effectively handle companion animals and livestock
- Willingness to work in both clinic and field settings even in adverse weather conditions
- Excellent verbal and written communication skills, including ability to explain veterinary jargon in lay terms
- Decisive decision-making skills
- Superior active listening skills
- Ability to receive and humbly accept constructive criticism
- Availability for rotational evening/weekend on-call shifts
- Fundamental computer skills (email, Word, Excel, etc.)

Desired Qualifications:

- Interest in or experience with assisted reproductive technologies (embryo transfer, in vitro fertilization, etc.)
- Completion of an internship or residency
- 1+ year experience as a practicing veterinarian

**We encourage new and soon-to-be graduates as well as experienced veterinarians to apply**

This full-time, salaried position is available immediately. We are pleased to offer our veterinarians a comprehensive benefits package and competitive salary that is commensurate with experience. Don’t miss this unique opportunity to join a new and growing practice. Please send cover letter and resume to info@reprologix.com.
