Working Title Assistant/Associate Professor in Global Production Animal Welfare
Salary Range Anticipated Hiring Range Commensurate with education or experience.
Position Number 00001473
Work Schedule Monday - Friday, 8 am - 5 pm
Full Time Equivalent (FTE) 1.0
Department 196001 - Dept-Population,Health,Pathobiology
Job City & State Raleigh, NC

Primary Function of Organizational Unit
As its mission, the Department of Population Health and Pathobiology strives to:
Prepare today's veterinary, undergraduate, and graduate students to respond to current and future challenges in both veterinary and human medicine.
Serve national and global endeavors focused on food animal production, veterinary medicine and human medicine through excellence in teaching, high impact research and discovery, veterinary clinical sciences, and extension/engagement.
Orient our research to the One Health approach focused on the areas of pathology, immunology/infectious disease, farm and food animal medicine (swine, poultry and ruminant), and epidemiology/global health benefiting both animal and human populations.
Our high standards of excellence position us as leaders in the Veterinary College, North Carolina State University, and profession. The College has gained international recognition on the strength of its teaching, research, engagement, and patient care efforts and is ranked 3rd among the nation's colleges of veterinary medicine in the current U.S. News & World Report survey.
Located on 180 acres near downtown Raleigh, the College encompasses 20 buildings on the main Centennial Biomedical Campus. Instruction is in three departments—Clinical Sciences, Molecular Biomedical Sciences, and Population Health and Pathobiology.
In addition to the four-year Doctor of Veterinary Medicine degree, there are programs leading to master and doctoral degrees in several areas with numerous opportunities for specialization.

Essential Job Duties
The NC State College of Veterinary Medicine is committed to the development of a multidisciplinary flagship program in Global Health in recognition of the critical role played by veterinary medicine in addressing global challenges related to food animal welfare and sustainability, production, food security, zoonotic diseases, animal health, and public health. To meet these needs, the college seeks to fill a position in Global Production Animal Welfare. The candidate is expected to establish an independent research program and work collaboratively with local and international producers, investigators, and with specialists in other disciplines to identify and address the welfare and health of production animals.
Candidates must have expertise in the practice of food animal production (poultry, cattle and/or swine), specifically in addressing animal welfare, husbandry, nutrition, and infectious disease investigation and prevention. The ability to work with investigators in developing countries is expected.
The successful candidate will be responsible for introducing a global health perspective on food animal welfare and production to food animal-focused DVM students through core teaching and research opportunities (domestic and abroad). The candidate is expected to assist with house officer, graduate and veterinary student teaching, and work with other faculty at the CVM to strengthen the relationship between the NC Diagnostic Laboratory (Rollins) and CVM, and expand collaborations with the NC State College of Agriculture and Life Sciences' Prestage...
Department of Poultry Science and/or the Department of Animal Science (candidate-dependent).
The candidate will liaise with industry, particularly those in North Carolina, to address emerging and persistent issues affecting poultry, swine and/or ruminant health; a timely response is expected.
Work with producers may include collecting, analyzing, and communicating data obtained through observation, questionnaires, and/or sample collection. The successful candidate is expected to work as a member of collaborative teams to develop and implement best practices that ensure the health and well-being of food-production animals in addition to addressing important relevant issues related to animal welfare that affects production, food security and public health. The successful candidate will have the opportunity to study the impact of food-borne zoonotic pathogens, antimicrobial resistance/alternatives to antimicrobials, emerging viral disease as they relate to animal welfare.
The candidate will interact with the Global Health Director on relevant animal welfare projects and issues. Domestic and international (overseas) travel for research, extension, and educational purposes is expected.
Applicants who are able to work across food animal species (e.g. poultry and swine) are encouraged to apply.
