Planting Date: September 20, 2006

Harvest Date: July 31, 2007

<sup>1</sup>Winterkill notes were not recorded since little winter injury was observed.<sup>2</sup>Average yields are from 2003, 2005, and 2007 since winter wheat was not grown in 2004 and 2006.

Previous Crop: Field Pea

Seeding Rate: 75 pounds per acre

Returns were calculated by multiplying the 2007 yield by protein premium or discount paid at the Southwest Grain Terminal located at Gladstone on September 4. The price paid on this date was \$6.04/bu for a grain protein concentration was 12%. \$.01/bu was paid for each additional 0.2% increase in grain protein up to 14%, above which an additional premium was not paid. Grain was discounted \$0.03/bu for each 0.2% reduction in grain protein from 12% to 10%, below which no additional discount was assigned. Returns factored in discounts for grain with a test weight < 60 lb/bu [-\$.01/bu for 0.5 lb/bu between 60 and 58 lb/bu; -\$.02/bu for 0.5 lb/bu between 58 and 57 lb/bu; -\$.03/bu for 0.5 lb/bu between 57 and 55 lb/bu; -\$.04/bu for 0.5 lb/bu between 55 and 52 lb/bu; and -\$.05/bu for 0.5 lb/bu between 52 and 51 lb/bu].
