

Duties faced in export markets

 [View in PDF](#)

Disclaimer:
The best preferential duty is based only on the lowest ad valorem tariff from all reported duty schemes an exporter is entitled to in a given market (importer). In practice however, it's possible that an importer restricts access to certain preferential duty schemes for specific partners (exporters). For example, a WTO member importer might choose to levy higher than MFN tariffs to imports from another WTO member for political or other reasons. These cases are not taken into consideration. Non ad-valorem tariffs are presented in the Detail Report at the tariff line level.
