Conversion Factors

Acceptable records of silage production must be converted from tons of silage to bushels of grain by multiplying the tonnage amount times the following conversion factors:

- 6.47 for barley
- 7.94 for corn
- 3.114 cwt. for grain sorghum multiplied by 100 divided by 56
- 4.08 for oats
- 5.00 for soybeans
- 6.99 for wheat.

Example: Farmer A's corn was harvested as silage. All production is weighed at 739.5 tons of corn silage. The actual corn grain production for that year would be 5,872 bushels. (739.5 tons x 7.94 bu. per ton = 5,872 bushels)

Acceptable records of hay production must be converted to bushels by multiplying the tonnage amount times the following conversion factors:

- 18.49 for barley
- 22.69 for corn
- 8.89 cwt. for grain sorghum multiplied by 100 divided by 56
- 11.66 for oats
- 14.20 for soybeans
- 19.97 for wheat.

Livestock

Livestock Program Requirements

Two Components:

- **Eligible Livestock Producer**
- **Eligible Livestock**

Eligible Producer

[7 CFR 9.3] defines an eligible producer as a person or legal entity who shares in the risk of producing a crop or livestock and who is entitled to a share in the crop or livestock available for marketing or would have shared had the crop or livestock been produced and marketed.

A contract grower who does not own the livestock, will be considered a producer if the contract allows the grower to have risk in the livestock.

Eligible Producer

Livestock owners and contract growers who are at risk and have a share of the livestock available for marketing or would have a share had the livestock been marketed are eligible livestock producers.

CFAP Eligibility for Livestock

- **Livestock that realized a 5-percent-or-greater national market price decline between the average for the week of January 13-17, 2020 relative to the average for the week of April 6-10, 2020, have been determined eligible for CFAP.**
- **National payment rates have been determined based on those price declines.**

Eligible Livestock

Livestock Category	Eligible Livestock
Cattle	• Feeder Cattle: Less Than 600 Pounds
	• Feeder Cattle: 600 Pounds or More
	• Slaughter Cattle: Fed Cattle
	• Slaughter Cattle: Mature Cattle
	• All Other Cattle
Hogs and Pigs	• Pigs: Less Than 120 Pounds
	• Hogs: 120 Pounds or More
Lambs and Yearlings	• All Sheep Less Than 2 Years Old

- **Feeder cattle less than 600 pounds** means cattle weighing less than 600 pounds.
- **Feeder cattle 600 pounds or more** means cattle weighing more than 600 pounds but less than slaughter cattle-fed cattle as defined.

- **Slaughter cattle—fed cattle** means cattle with an average weight in excess of 1,400 pounds which yield average carcass weights in excess of 800 pounds and are intended for slaughter.

NOTE: This definition in [7 CFR 9.2] was established based on NASS cattle slaughter data. The "1400 pounds" referenced in the definition used an average weight of 1200 to 1600 pound slaughter weight. The livestock category "Slaughter Cattle: Fed Cattle is to provide assistance to eligible livestock producers who have sales and/or inventory of "finished" cattle weighing 1200 to 1600 pounds, reaching an optimal combination of weight, muscle, and fat and ready for slaughter.

- **Slaughter cattle—mature cattle** means culled cattle raised or maintained for breeding purposes, but which were removed from inventory and are intended for slaughter.
- **All other cattle** mean commercially raised or maintained bovine animals not meeting the definition of another category of cattle in this rule excluding beefalo, bison, and animals used for dairy production or intended for dairy production.

- **Pigs** means any swine weighing less than 120 pounds.
- **Hogs** means any swine 120 pounds or more.
- **Lambs and yearlings** mean all sheep less than 2 years old.

Eligible Livestock:

- Livestock owned on Jan. 15 and sold between Jan. 15 and April 15, 2020
- Offspring born from that Jan. 15 inventory
- Livestock inventory owned between April 16 and May 14, 2020
- Livestock that are no longer used for dairy production and have entered the beef cattle market

NOTE: All sales and inventory of livestock must be subject to price risk as of January 15, 2020.

Ineligible Livestock:

- Livestock used for dairy production or intended for dairy production
- Livestock purchased after Jan. 15, 2020 and sold on or before April 15, 2020
- Livestock subject to an agreed upon price in the future through a forward contract, agreement, or similar binding document as of Jan. 15, 2020

- Dairy cattle that are no longer used for dairy production and have entered the beef cattle market are eligible for CFAP, for example:
 - Dairy cull cows – “Slaughter Cattle – Mature Cattle”
 - Dairy calves – Feeder Calves < > 600 pounds
- Dairy cattle used for dairy production or intended for dairy production are not eligible for CFAP-Livestock, however milk production from this livestock is eligible for CFAP-Dairy.

The information required from producers to participate in CFAP will be a self-certification by the producer or authorized representative.

The following sales and inventory information is required from livestock producers, as applicable:

Part 1 of Application

- Owned inventory of eligible livestock as of Jan. 15 and any offspring from that inventory, that were subject to price risk and sold between Jan. 15 and April 15, 2020
 - Item No. 21 on AD-3114

Part 1 (CARES Act Funds) Payment	Part 2 (CCC Funds) Payment
<p>Payment is calculated by multiplying the number of livestock sold between January 15 and April 15, 2020, by the payment rate per head.</p> <p>Note: Livestock must have been owned by the producer on January 15, 2020. Any offspring born from that same inventory are eligible.</p>	<p>Payment is calculated by multiplying the highest livestock inventory between April 16 and May 14, 2020, by the payment rate per head.</p>
