

August 16 2017

Welcome to the NDSU Potato Blightline sponsored by Syngenta Crop Protection.

Current recommendations:

Additional late blight was reported yesterday from the rural municipality of Stanley in southern Manitoba. With the recent lingering cool and wet weather, all producers should be on the lookout for late blight and be applying fungicides.

Remember the NPPGA field day next week on Thursday August 24 at Larimore, Inkster and Hoople.

Thank you for using the NDSU Blightline.
