

Teboh, JM, Aberle, E., Fortuna, A-M, Schatz, BG.

Summary sheet for CREC field day event: Wheat and corn grain yields from 2007 to 2010

Treatments applied to plots in Split-split-plot arrangement as follows: Main plots are 1.24ac = Three 4-year crop rotations; Sub-plots are 60ft x 300ft = .41ac = Tillage system [Min (T1 M), No-till T2 N), traditional (T3 T)]; Sub-sub-plots are 60ft x 100ft = 0.14ac = N regime.
