HOW TO NOMINATE A CHAMPION TREE – Page 56

Champion Tree Program

The NDSU-North Dakota Forest Service maintains the records for the Champion Tree Program. The “ND Register of Champion Trees” contains the champion trees and the runner-ups. Nominations for the largest tree of each genus and species are accepted throughout the year, and are due no later than December 31. The register is updated with the new champions and released shortly after the New Year.

Roots of the Program

On May 4, 1984, the ND Society of American Foresters and the ND Tree Farm Committee began a public contest on Arbor Day (the first Friday of May in ND) to find the largest of each native tree species in the state. The contest focused on getting some attention for trees and their owners, while having some fun. It was modeled after the “National Register of Big Trees” run by American Forests. The owner(s) of the largest tree in each native tree species category below received a wood plaque as a prize the following Arbor Day.

American elm	Cottonwood	Peach leaf willow
Balsam poplar	Green ash	Ponderosa pine
Birch	Hackberry	Quaking/trembling aspen
Black ash	Ironwood	Rocky Mountain juniper
Boxelder	Limber pine	Slippery elm
Bur oak	Linden/basswood	Missouri River willow

In 1986, when North Dakota’s state centennial emphasis on *planting 100 million trees* was initiated, the North Dakota Forest Service and Centennial Trees Commission joined as sponsors. The “ND Champion Tree Register” was renamed and expanded to include the first and second native and non-native trees. Since that time, winners and nominators have both received a certificate and have been included in the Register. Missouri River willow was added to the NRCS FOTG (Field Office Technical Guide) in 2016 as a native ND tree.

Common Questions

What is a tree? A tree is defined as any plant that has achieved one erect perennial woody stem or trunk at least 3 inches in diameter 4-1/2 feet above the ground (breast height); a definitely formed crown of foliage; and a height of at least 13 feet. To be a champion tree, a tree must meet these minimum requirements. In contrast, shrubs are small woody plants, usually with several perennial stems branching at the base.

What is eligible? A tree is eligible as long as it is rooted and in relatively good health. Measurements for height and average crown spread incorporate all parts of the tree, dead or alive. Native and common non-native trees growing in North Dakota are acceptable. Only major species are accepted. Cultivars, named varieties, ornamentals, and unclassified varieties are excluded.

Note: The classification of various species as invasive is not consistent across state boundaries, since each species does not always exhibit invasive characteristics in every location. State coordinators shall decide whether a nominated tree fits the definition of invasive in their state and, therefore, exclude that species from nomination to the Register. Common buckthorn was removed in 2011, as it is considered an undesirable species in North Dakota.

How long does a champion tree stay in the register? A tree stays in the register until it is dethroned by a larger tree, dies, or is removed. When two trees have scores that fall within 5 points of each other, they may be listed as co-champions. Trees are measured not more than every five years.

Can I visit the champion trees? The champion trees located on public land can be visited without a problem. If a tree is located on private land, we ask that you respect the private landowner and ask permission before making a visit.

How can I nominate a champion tree? At the back of this register is the information you need and a form that can be submitted to the ND Forest Service by December 31.

What is North Dakota's largest tree? A cottonwood in Steele County with a girth of 360 inches (30 feet), 105 feet tall, and an average crown spread of 108 feet.

What is the nation's (and world's) largest tree? The "General Sherman" giant sequoia in California is the largest living thing in the world (as heavy as 360 elephants) with a girth of 1231 inches (102-feet), 275 feet tall, and an average crown spread of 107 feet.

American Forests keeps the record for the "National Register of Big Trees," sponsored by the Davey Tree Expert Company. This program began in 1940. A copy of the national register of big trees can be found at their web site at: <https://www.americanforests.org/get-involved/americas-biggest-trees/champion-trees-national-register/>

The **NDSU-North Dakota Forest Service** provides the "ND Register of Champion Trees" free upon request in hard copy or it can be found on our web site in a pdf file at: <https://www.ag.ndsu.edu/ndfs/about-north-dakota-forestry/champion-trees-of-north-dakota>

ND State Fossil – Teredo Petrified Wood

North Dakota was one of the first states to recognize a fossil symbol. Teredo petrified wood was designated as the official state fossil in 1967. Teredo petrified wood is unique because of the "worming" of the original wood by the prehistoric teredo - a worm-shaped mollusk related to modern clams, mussels, and oysters. 60 to 80 million years ago, the teredo was burrowing through trees growing near the edges of warm swamps in North Dakota during the Paleocene Epoch.

HOW TO NOMINATE A CHAMPION TREE

1. If you think you have a champion, fill in the nomination form on Page 56 and mail or email it along with a (jpg) photo to the address at the bottom of the form. Forms are due by December 31 each year. If you have any questions, contact Beth Hill at (701) 220-5986 or Beth.Hill@ndsu.edu.
2. A tree is defined as any plant that has achieved one erect perennial woody stem or trunk at least 3-inches in diameter at 4-1/2 feet above the ground (breast height); has a definitely formed crown of foliage; and a height of at least 13-feet. To be a champion tree, a tree must meet these minimum requirements. In contrast, shrubs are small woody plants, usually with several perennial stems branching at the base.
3. A tree is eligible as long as it is rooted and in relatively good health. Native and naturalized non-native trees growing in North Dakota are acceptable. Only major species are accepted, **NO cultivars or named varieties**. Common buckthorn was removed in 2011, as it is considered an undesirable species in North Dakota.
4. If you are not sure what type of tree you have, you may also send in photos, or submit a small branch with several attached twigs and leaves so it can be identified. Put them in a sealed plastic bag and mail it along with the nomination form in a bubble bag.
5. If the tree is a possible new state champion, a forester or designated representative will visit the tree and officially measure it.
6. If it is a new state champion, the owner and nominator will each receive a certificate and the tree will be added to the “ND Champion Tree Register.” It will stay there until it is dethroned by a larger tree or dies.

HOW TREES ARE MEASURED TO GET POINTS

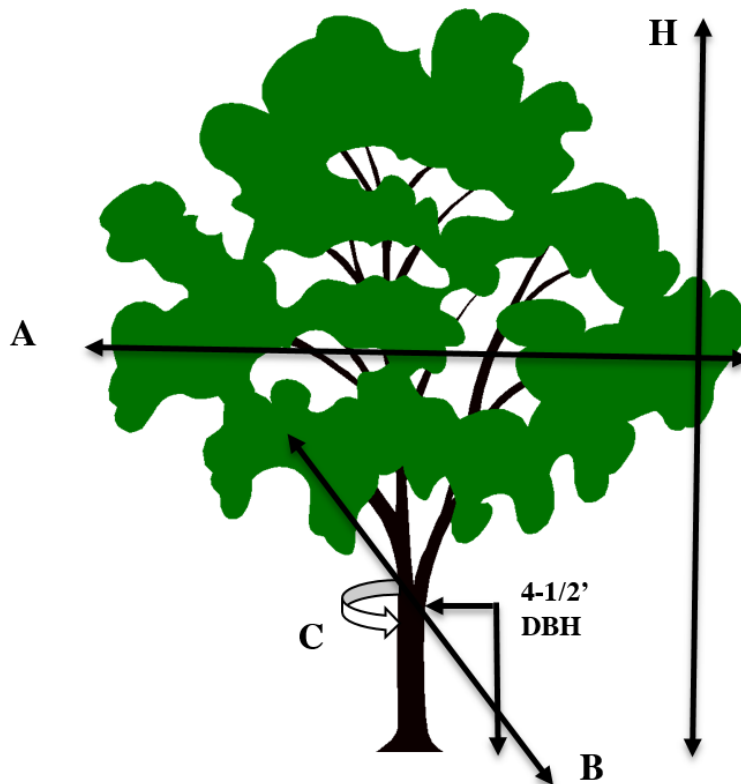

The following formula accumulates three measurements to get the **Total Points: Circumference (in inches) + Height (in feet) + ¼ of the Average Crown Spread (in feet)**.

(C) Circumference of the trunk at breast height (4-1/2 feet above the ground) in feet and inches. If there is a fork at this point, measure the smallest circumference below the fork. If it branches below 4-1/2 feet, measure the largest fork above the branching.

(H) Height in feet, from the base to the topmost twig of the tree.

(A & B) One quarter of the *average Crown Spread* in feet. The crown spread should be measured in two directions, perpendicular to each other, at the widest portion and the narrowest. The average of the two measurements is taken as the average crown spread.

The total of these three rounded figures gives a single figure denoting the score. In case of a tie, the tree with the largest trunk circumference becomes the winner. Trees will not be re-measured until five years have passed.
