

# LEM BITS

Livestock Environmental Management Newsletter **Volume 3, Issue 4. December 2014**

## VOLUME 50% REDUCTION 50%

The total volume of manure can be reduced by 50% when correctly composted.  
(Source: NM-1478)

As 2014 comes to a close, I would like to thank the LEM News readers for your participation in programs and your feedback which helps make the LEM programs more applicable for you.

I appreciate it. Have a safe and happy holiday season!  
—Mary Berg

personal clientele farm visits  
in 2014  
to discuss manure & nutrient management.

# 15

ND Counties served in 2014. Add Canada, Minnesota, and North Carolina, too!

### What ND Manure Comes From...

...ND Livestock Inventory

39,300,000 acres of North Dakota's land area is in farms (that's nearly 90% of ND's total). ND is home to 30,800 farms, with an average farm size of 1,276 acres.

“You have a great team; support and sharing shows.” —Participant at the 2014 NM Day, about the CREC crew.
