

NDSU/UMN Potato Late Blight Spore Trapping Network July 15-29, 2019

Welcome to the third report from the NDSU/UMN Potato Late Blight spore trapping network. Two weeks (July 15-29) are combined in this report with 16 locations reporting over this time period. No late blight spores were recovered in the filters. As the legend in the map indicates, green dots indicate no late blight spores recovered at the marked locations and grey dots indicate no report.
