<sup>1</sup>Days after Planting

NS = no statistical difference between varieties.

\*The 2021 trial sustained extreme heat and moisture stress. Data from this trial may be unreliable and should be viewed with caution. 2 and 3 year average yields do not include 2021 data.

Planting Date: May 20

Harvest Date: September 1

Seeding Rate: 2.5 million PLS/A

Previous Crop: 2017 &amp; 2019 = spring wheat, 2020 = chickpea

Soil Type: Williams Loam      Tillage: no-till

Note: The 2018 trial sustained herbicide (sulfentrazone) injury resulting in inconsistent yields.

The 2019 trial sustained severe drought and seed shatter prior to harvest. Data not reported.
