

## Prevail Hard Red Spring Wheat

## Strengths

- High yield potential
- High test weight
- Moderate scab resistance
- Tall semi-dwarf

## Comments

Prevail hard red spring wheat was released in 2014 by the South Dakota Agricultural Experiment Station. This variety has high yield potential and high test weight. It is better adapted to southern areas of ND. The height of Prevail is relatively short and its maturity is mediumearly. It is moderately resistant to scab, has average protein content, and acceptable milling and baking qualities. Prevail was tested in the South Dakota Crop Performance Testing trials in 2011-2013 where it performed well. The Wheat Quality Council also evaluated it in 2012. North Dakota Foundation Seedstocks distributed Prevail in 2014 through the North Dakota Crop Improvement and Seed Association county increase program.

Agronomic Performance of Prevail at 2 ND Locations, 2012-2013
