

# Lariat

## Pinto Bean

**NDSU** NORTH DAKOTA STATE UNIVERSITY

### Characteristics

Plant Type	upright short vine
BCMV	resistant
Rust	resistant <sup>1</sup>
Maturity	medium-late
Canning Quality <sup>2</sup>	acceptable

<sup>1</sup> Susceptible to new rust race 20-4.

<sup>2</sup> Scale of 1 to 7 where scores between 1 and 3 are considered unacceptable, 4 acceptable, and 5 to 7 highly desirable.

### Comments

**Lariat** pinto bean was released in 2007. This high yielding variety has excellent seed quality and very good lodging resistance. Lariat has an upright growth habit and also has synchronous dry-down of plant and pods at harvest. Lariat is resistant to rust, bean common mosaic virus (BCMV), and anthracnose race 7. It is susceptible to anthracnose race 73. The seed size of Lariat is very uniform and is slightly larger and of similar appearance to Maverick.

### Strengths

- Upright growth habit
- High yield
- Good synchronous dry-down

### Agronomic Performance of Lariat Across ND, 2010-2013

	Lariat	ND-307	Stampede	La Paz	Sonora	Windbreaker
Seed Yield (lbs/acre)	2424	2361	2319	2465	2257	2501
100 Seed Weight (g)	37.9	38.5	37.0	35.6	31.2	39.2
Height (inches)	20.0	19.9	20.9	20.3	18.7	18.4
Days to Flowering	51	50	50	52	50	49
Days to Maturity	101	98	97	98	96	96
