¹ Refers to agent or developer: MN = University of Minnesota, MT = Montana State University, ND = North Dakota State University, SD = South Dakota State University. **Bold** varieties are those recently released so data is limited and rating values may change.

² Straw Strength = 1 to 9 scale, with 1 the strongest and 9 the weakest. These values are based on recent data and may change as more data become available.

³ Days to Head = the number of days from planting to head emergence from the boot averaged over several locations in 2010 and 2011.

⁴ R = resistant, MR = moderately resistant, M = intermediate, MS = moderately susceptible, S = susceptible. NA indicates insufficient information is available to make an accurate assessment.

⁵ Leaf spot refers to the leaf fungal diseases such as tan spot and septoria. It does not include bacterial leaf streak.

⁶ Solid stemmed or semisolid stem, imparting resistance to sawfly. ⁷ Hard white wheat.

⁸ CL = refers to a Clearfield variety, with tolerance to Beyond™ family of herbicides.

⁹ These lines were resistant to moderately resistant to races prevalent prior to 2011, and show some level of susceptibility to a new race of the pathogen that was detected at low frequency in 2012.

Note: Published in NDSU publication A-574 (revised).
