¹Refers to agent or developer: Can. = Agriculture Canada, WB = Westbred, ND = North Dakota State University, DGP = Dakota Growers Pasta.

² Straw Strength = 1-9 scale, with 1 the strongest and 9 the weakest. Based on recent data. These values may change as more data become available.

³ Days to Head = the number of days from planting to head emergence from the boot. Averaged from several locations in 2010.

⁴ R = resistant, MR = moderately resistant, M = intermediate, MS = moderately susceptible, S = susceptible, VS = very susceptible, Foliar Disease = reaction to tan spot and septoria leaf spot complex.

⁵ Alzada has a disease-resistance package that makes it more adapted to drier growing conditions (for example, western North Dakota).

⁶ Indicates yields and/or quality often have been higher than would be expected based on visual symptoms. NA = Not adequately tested.
