

NPPGA Research Reporting Conference

17 February 2015

Alerus Center, Grand Forks, ND

8:00-9:00		Registration and donuts
9:00-9:30	Dr. Sanjay Gupta	Inheritance of Biochemical Markers for Resistance to Cold-Induced Sweetening and Improved Nutritional Quality to Compliment Potato Breeding and New Variety Development
9:30-10:00	Dr. Ian MacRae	Apprehending Aphids and Bagging Beetles - News on Aphid Vectors of PVY and Colorado Potato Beetle Populations
10:00-10:30	Dr. Susie Thompson	From Hybridizing to Release - Cultivar Development for the Northern Plains
10:30-11:00		Break
11:00-11:30	Dr. Gary Secor	Fusarium Sensitivity to Fungicides
11:30-11:45	Mr. Francisco Bittara	Screening for Tuber Resistance to Powdery Scab
11:45-12:00	Ms. Amanda Crook	Marketability and Seed Production Effects from Glyphosate Drift Injury to Red Norland Potato
12:00-12:15	Dr. Joe Sowokinos and Marty Glenn	Storage and Processing Evaluation of Advanced Potato Breeding Clones
12:15-12:30	Drs. Susie Thompson, Gary Secor, and Andy Robinson	What is the PAA and How Can You Get Involved
12:30-1:30		Lunch
1:30-2:00	Dr. Neil Gudmestad	Cultivar Susceptibility to Moptop Virus
2:00-2:30	Dr. Carl Rosen	Comparison of Nitrogen Response in New and Old Potato Fields
2:30-3:00	Dr. Andy Robinson	Improving Your Potato Production with Agronomy, Variety, and Weed Research
3:00-3:15	Dr. Andy Robinson	New Extension programming for 2015
