NDSU EXTENSION
SERVICE

County Commissions, NDSU and
U.S. Department of Agriculture Cooperating.
NDSU is an equal opportunity institution.

This videoconference will cover options for producing a high-quality hay product in wet weather.

Dan Undersander, University of Wisconsin Extension forage specialist, will discuss using baleage for creating a high-quality fermented hay product for the beef industry.

He also will speak on the use of preservatives, including types, and application rates and methods, as well as cost effectiveness. It is designed to be interactive.

Topic areas will be followed by ample time for discussion. Please come with questions.

The workshop is free of charge. Contact your location of choice directly to register.
