

3D Printing with Stratasys

Thursday April 16, 2015

It goes by many names, Rapid Prototyping, Additive Manufacturing, 3D Printing. This disruptive technology has seen many recent advancements which have propelled it to the forefront of industry and even into our homes. It is accelerating innovation, transforming healthcare, and revolutionizing manufacturing. If you are looking for a great learning opportunity please join us for 3D printing with Stratasys!

Audience: Students, faculty, industry, and anyone interested in 3D printing technology.

Cost: Free

Location: NDSU Quentin Burdick Building 104 (formerly IACC)

When: Thursday April 16th (3:30 pm-5:00 pm)
(Time available after the seminar for networking!)

Topics

- Intro to 3D printing: Jayme Renner, Global Technologies
- Ease of 3D printing: Todd Woolston, Mid-West 3D Solutions, LLC
 - uPrint SE Plus demonstration
 - Scanning and reverse engineering
- History of Stratasys: Jim Ustar, Stratasys
- Various samples for viewing and software demonstration
