### North Dakota Rural Fire Danger Guide

**Open Burning**
- Use fire tools and monitor the fire at all times. Restrict burning to early morning and late evening hours when low wind conditions exist.
  - **Examples**
    - Campfires: Clear area around fire.
    - Brush, Field, Ditch, Haystack: Clear fuel from the area surrounding the burn site.

**Off-Road Motorized Travel**
- Carry fire extinguishers and fire tools. Pay attention to fire hazards posed by exhaust systems and catalytic converters.

**Smoking**
- Restrict smoking to areas free of combustible materials. Use ashtrays and proper disposal containers.

**Fireworks**
- Use of fireworks by individuals is prohibited. Consumer fireworks are only legal from June 27 to July 5.

**Equipment Operations**
- Carry fire extinguishers and fire tools, as recommended.
  - **Examples**
    - Farming: Conduct frequent inspections of farm machinery to reduce debris accumulation.
    - Petroleum Industry: Confine blasting for seismic exploration by 10 feet or more of soil. Inspect and properly maintain equipment.
    - Welding: Use spark arresters as recommended and keep a 10-foot radius surrounding a welding site cleared of combustible material.
    - Railroads: Conduct weekly inspection of exhaust arrester systems and brakes.

**Exclusions**
- Fire operations by trained fire professionals.

---

### Outdoor Activity Guidelines

#### For the Very High Index (Stage 1 Restrictions)

**Open Burning**
- Use fire tools and monitor the fire at all times. Restrict burning to early morning and late evening hours when low wind conditions exist.

**Off-Road Motorized Travel**
- Carry fire extinguishers and fire tools. Pay attention to fire hazards posed by exhaust systems and catalytic converters.

**Smoking**
- Restrict smoking to areas free of combustible materials. Use ashtrays and proper disposal containers.

**Fireworks**
- Use of fireworks by individuals is prohibited. Consumer fireworks are only legal from June 27 to July 5.

**Equipment Operations**
- Carry fire extinguishers and fire tools, as recommended.
  - **Examples**
    - Farming: Conduct frequent inspections of farm machinery to reduce debris accumulation. Remain at the work site one-half hour after operations are completed.
    - Petroleum Industry: Confine blasting for seismic exploration by 10 feet or more of soil. Inspect and properly maintain equipment. Monitor burning of by-products. Remain at the work site one-half hour after operations are completed.
    - Welding: Use spark arresters, as required, and keep a 10-foot radius surrounding a welding site cleared of combustible materials. Water tanks with 100 gallons and 100 feet of hose are required.
    - Railroads: Conduct weekly inspections of exhaust arrester systems and brakes.

**Exclusions**
- Fire operations by trained fire professionals.

---

### Outdoor Activity Guidelines

#### For the Extreme Fire Danger Index (Stage 2 Restrictions)

**Open Burning**
- Open burning is prohibited. Open burning does not include fires in enclosed chambers that pass through a chimney or a stack and utilized on a flat surface.

**Off-Road Motorized Travel**
- Off-road motorized travel is prohibited except for persons engaged in a trade, business or occupation where it is required. Fire extinguishers and fire tools are required.

**Smoking**
- Restrict smoking to inside of vehicles, places of habitation and areas cleared to mineral soil. Use ashtray and proper disposal containers.

**Exclusions**
- Fire operations by trained fire professionals.

*This brochure is a collaborative project of the North Dakota Department of Emergency Services, your local emergency manager, the ND Forest Service, the State Fire Marshal, and the ND Fire Council.*
In North Dakota, it’s common practice during spring and fall to burn fields, trees, and debris in agricultural and rural settings. It’s also common practice for outdoor enthusiasts to build campfires while enjoying the state’s outdoor recreational opportunities. Equipment operators also increase their activities during warmer months.

Each year, approximately 500 rural fires grow out of control, endangering people and wildlife, and causing damage to nearby acreage, buildings, and other property. Inadequate control and burning during high fire danger conditions cause the majority of these fires.

The North Dakota Rural Fire Danger Guide, designed for landowners, equipment operators, and outdoor enthusiasts, outlines procedures that will greatly reduce the chance that rural fires will threaten lives and property.

**Fire Danger Index**

The Fire Danger Index, issued by the National Weather Service (NWS), serves as a guide to reduce the number of uncontrollable outdoor fires. The index is an indication of rural fire potential throughout the state and provides citizens with needed information about fire safety conditions.

The index contains five ratings: low, medium, high, very high and extreme. Fires are more likely to occur on higher index days and more likely to grow in size. The Fire Danger Index does not predict how a fire will behave; however, the indices give an indication of overall fire activity.

Normally, the NWS calculates the Fire Danger Index for each county using predicted values for temperature, humidity, wind speed, cloud cover, and vegetative greenness.

The NWS also issues Fire Weather Forecasts and Red Flag Warnings that refer to weather conditions which could sustain extensive rural fire activity. These forecasts and warnings are used to alert land management agencies and land users when dangerous burning conditions and increased rural fires exist.

When the vegetative greenness component deteriorates to the point of creating an unusual fuel condition with a high Energy Release Component (ERC), the North Dakota Fire Council will scientifically analyze this condition and recommend specific counties be placed in the extreme category, regardless of daily weather conditions including temperature, humidity, wind speed and cloud cover.

By law, landowners, equipment operators, and outdoor enthusiasts are required to use firebreaks and proper precautions during all open burning situations. The following three charts list other outdoor activity guidelines for the five fire danger indices.

### Outdoor Activity Guidelines For the Low, Medium, and High Fire Danger Indices

The NWS issues the North Dakota Rangeland Fire Danger Statement each morning during fire season, typically from April 1 to October 31. Information about current fire danger indices is available through county sheriff offices, the NWS (www.crh.noaa.gov/bis/?n=fireweather) or the ND Department of Emergency Services (www.nd.gov/des/info/firedanger.html).

When the fire danger index reaches the very high or extreme categories, certain guidelines for outdoor activities are recommended to reduce the chance of life-threatening or property-damaging rural fires.

During severe, extended dry conditions or drought, the Governor may issue a proclamation mandating these guidelines. Fines and other penalties may be assessed for failing to comply.

Local governments may institute a burn ban regardless of the fire danger index.

By law, landowners, equipment operators, and outdoor enthusiasts are required to use firebreaks and proper precautions during all open burning situations. The following three charts list other outdoor activity guidelines for the five fire danger indices.
