

August 27, 2018

Welcome to the NDSU Potato Blightline for 2018 sponsored by Syngenta Crop Protection.

Current recommendations:

Congratulations to all the potato industry in our region. No late blight was reported in ND, MN or MB during this growing season. This will be the final regular NDSU Potato Blightline for 2018.

We want to thank Syngenta Crop Protection for sponsoring the Blightline, and also thank the many consultants, growers, allied industry reps, and others who regularly used the Blightline. We appreciate your support as late blight is a community disease and we all need to work together to manage it. We anticipate continuing the Blightline in 2019.

Thank you for using the NDSU Blightline in 2018.
