

NDSU/UMN Potato Late Blight Spore Trapping Network

July 29 - August 5, 2019 UPDATE
August 5 - 12, 2019

There were more filters that came in for the week of July 29 to August 5. An updated report for this time period found no late blight spores during this time period. The week of August 5-12 also found no late blight spores in the 9 traps reported. As the legend in the map indicates, green dots indicate no late blight spores recovered at the marked locations and grey dots indicate no report.
