

## Population by Race and Hispanic Origin in North Dakota: Census 2000 and July 1, 2006 Estimate

According to the July 1, 2006 population estimates released by the U.S. Census Bureau, North Dakota's racial minority population (i.e., non-white) totaled 51,751 (8.1 percent of the state's total population). While the racial minority population in North Dakota grew 13.8 percent (6,269 people) between 2000 and 2006, the white population (which comprises the vast majority of all persons in the state) decreased 2.1 percent (12,602 people) (Table 1).

The American Indian population, North Dakota's largest racial minority, grew by 2,750 people between 2000 and 2006, an increase of 8.7 percent. During the same period of time, the black population grew by 1,105 (26.6 percent), the Asian population grew by 1,128 (28.8 percent), and persons of multiple races grew by 1,286 (21.5 percent) (Figure 1).

The Hispanic population (an ethnic category reported separately from race) currently represents 1.7 percent of North Dakota's total population and grew by 2,851 people (or 36.6 percent) between 2000 and 2006. Nationally, the Hispanic population grew 25.5 percent between 2000 and 2006 (Figure 2).

# Population Bulletin -Press Release-

A Monthly Publication by the North Dakota State Data Center at North Dakota State University, an Equal Opportunity Institution

Volume 23,  
Number 11,  
November 2007

Date of Release: November 8, 2007

## Racial Diversity in North Dakota Continues to Rise

Though racial minorities in North Dakota continue to represent a relatively small proportion of the state's total population (fewer than one in 10), their numbers are rising.

This month's "Population Bulletin," a monthly publication from the North Dakota State Data Center at North Dakota State University, presents the July 1, 2006 population estimates by race as released from the U.S. Census Bureau, Population Estimates Branch. These current estimates reveal a continuing increase in population diversity throughout North Dakota. North Dakota's racial minority population (i.e., non-white or multiple races) totaled 51,751, comprising 8.1 percent of the state's total population of 635,867. While the white population (which comprises the vast majority of all persons in the state) declined 2.1 percent (12,602 people) between 2000 and 2006, the racial minority population in North Dakota grew 13.8 percent (6,269 people). "We need to keep context in mind when we interpret the growth of our state's minority population. Even though our racial minority population grew by nearly 14 percent, the actual numeric change is relatively small," said Richard Rathge, Director of the State Data Center.

The American Indian population, North Dakota's largest racial minority, grew by 2,750 people between 2000 and 2006, an increase of 8.7 percent. During the same period of time, the black population grew by 1,105 (26.6 percent), the Asian population grew by 1,128 (28.8 percent), and persons of multiple races grew by 1,286 (21.5 percent).

The Hispanic population (an ethnic category reported separately from race) currently represents 1.7 percent of North Dakota's total population and grew by 2,851 people (or 36.6 percent) between 2000 and 2006. Nationally, the Hispanic population grew 25.5 percent between 2000 and 2006.
