2018 Summer R&D Technician with Syngenta

Syngenta is looking for a motivated individual with an agricultural background or with interest in an agricultural related field to work as a Summer Technician - Research & Development. The Summer Technician will work with the Syngenta Research & Development Scientist on herbicide, fungicide and seed care projects in North Dakota and NW Minnesota. The position will provide hands on experience in weed, insect and plant disease management with one of the leading crop protection companies. The position is located in the Fargo / Moorhead area and will run from May through August.

Candidates should be self-motivated and be able to work safely with others as part of a team as well as individually. The position will require driving of company vehicles so a good driving record is required. Experience with small agricultural equipment is also preferred.

Interested individuals can contact Brett Miller.
