The NDSU-Williston Research Extension Center (WREC) is seeking applicants to participate in a summer internship program. The goal of this program is to provide students the opportunity to experience horticultural research through variety trials, landscape management, crop/pest management and high tunnel production research. Interns will have the opportunity to participate in the agronomic and horticultural programs at our dryland and irrigated research sites.

**Responsibilities**

- Basic tasks associated with horticultural crop variety trials including, but not limited to, collection of data on diseases, plant height, yield and other important aspects of horticultural research trials.
- Assist with all areas of landscape management, maintaining fruit and vegetable gardens, work with high tunnels and the use of equipment such as lawn mowers, tractors, tillers, etc.
- Other duties as assigned.

Applicants should be: motivated, hard working, have an ability to work in a team-setting, and physically able to perform under adverse weather conditions.

This is a paid internship and housing will be available, although transportation to and from work location is not provided. All interested applicants should submit a resume and application form from the WREC website. Starting and ending dates will be determined on an individual basis, but this will be a twelve week internship. Applications are due by March 31st and applicants will be notified by May 1st.
