Lake Geneva Country Club, Lake Geneva, Wisconsin

Lake Geneva Country Club is an exclusive private club located on the shores of beautiful Lake Geneva, WI. It was established 120 years ago and designed by Robert Foulis, an apprentice of famed greenskeeper Old Tom Morris at the Links of Saint Andrews. As part of a master plan to return many of its original features and improve turfgrass quality, the golf course recently underwent major renovations including: fumigation and regrassing of greens, and renovations of bunkers, tees and greens complexes. In 2016 a new state of the art maintenance facility is scheduled for construction.

Interns will work closely with the superintendent and assistant to ensure the best conditions possible are attained on this "high maintenance" golf course. Interns will be given the opportunity to learn and become proficient in all aspects of golf course management including:

- Managing pure stands of T-1/alpha bentgrass greens
- Running the Toro SitePro Osmac irrigation system
- Repairing and installing irrigation components
- Repairing and installing drainage
- Chemical applications
- Cultural practices, i.e. topdressing, aerating, verticutting, sodding
- Equipment operation and mowing practices
- Tree trimming and removals
- Landscaping and flowerbeds
- Crew management and leadership

The Lake Geneva area is centrally located an hour from Chicago, Milwaukee, and Madison. Housing is provided on-site, including lunch time meals. This position is recommended for motivated, hard-working individuals who are preparing to become successful turfgrass professionals.

Applicants must be enrolled in, or graduating from a 2 or 4 year turf management program. Future promotions are possible for graduates following the internship.

$11.00 per hour plus overtime, meals, housing, and golfing privileges.
