NDSU Department of Plant Sciences
Summer 2016 Internship (Fellowship) Opportunity

Type of experience:
Field and/or laboratory research. Many areas are available; e.g., biotechnology, forages, plant breeding and genetics, agronomic or horticultural crop production, weed science, turfgrass management, woody plants, food processing and cereal science.

Objective:
To provide an exploratory research assistantship for students who are considering graduate studies in Plant Sciences, Horticulture, or Cereal Science. Graduate students receive a stipend (monthly salary) and tuition waiver while doing research and completing coursework toward a graduate degree.

Time period:
13 weeks of the 14 week period from May 16, 2016 through August 19, 2016.

Salary:
$7,150

Selection procedure: Interviews will be held with four PLSC faculty. Students selected will visit with PLSC faculty to explore the opportunities available and select their project preferences.

Interview scheduling will begin the week of January 25, 2016.
