# Linuron (Linex)

## Advantages

- Inhibitor of photosystem II, site B (group 7)
- Less potato crop tolerance issues with linuron
- Control weeds that may be hard to kill with other herbicides
- 1/12<sup>th</sup> as soluble as metribuzin

## Challenges

- No aerial application allowed
- Cost
- Doesn't work well in soils with high clay content or high OM
- Preemergence only

# Today's Focus

- Quantifying the effects of Linex + Metribuzin preemergence, at emergence, and postemergence on weed control and yield.

# Procedures

- Location: Ottertail, MN
- Planting date: 5 May 2014
  - In-row spacing: 14 inches, depth: 1 in below ground
- Emergence: 5 June 2014
- Harvest date: 23 September 2014
- Soil: 90% sand, pH 6.8, OM 1.4%
- Sprayer setup: nine-foot CO<sub>2</sub> backpack sprayer calibrated to deliver 15 gal/acre using XR11002 nozzles.

# Treatments

<b>Treatment</b>	<b>Rate</b>	<b>Date</b>	<b>Timing</b>
1 Untreated			
2 Linex 4L	12 fl oz	29 May	Preemergence
	Metribuzin 0.7 lb/a		
3 Linex 4L	12 fl oz	5 June	50% Emergence
	Metribuzin 0.7 lb/a		
4 Linex 4L	12 fl oz	21 June	8-10 inch tall
	Metribuzin 0.7 lb/a		
5 Linex 4L	24 fl oz	29 May	Preemergence
	Metribuzin 0.7 lb/a		
6 Linex 4L	24 fl oz	5 June	50% Emergence
	Metribuzin 0.7 lb/a		
7 Linex 4L	24 fl oz	21 June	8-10 inch tall
	Metribuzin 0.7 lb/a		

# Measurement

- Visual estimate of crop injury, biomass, chlorosis, necrosis, and weed efficacy
  - 14 and 28 DAT
- Graded yield

26 June 2014, Ottertail, MN

# Estimated Injury

Treatment	Rate	Timing	Crop injury	Crop injury	Biomass	Biomass
			14 DAT	28 DAT	14 DAT	28 DAT
1 Untreated			0c	0b	100a	100a

7 Linex 4L	24 fl oz	8-10 inch tall
	Metribuzin	0.7 lb/a

# Take Home Message

- Application at 50% emergence had no crop injury, chlorosis, necrosis, or biomass loss. Weed control was excellent and yields generally were the best.
- Apply Linex + Metribuzin as close to emergence as you are comfortable.
