

NDSU/UMN Potato Late Blight Spore Trapping Network

July 29 - August 5, 2019

Welcome to the NDSU/UMN Potato Late Blight spore trapping network. The week of July 29 to August 5 is reported below with 9 locations reporting over this time period. No late blight spores or DNA were recovered in the filters. As the legend in the map indicates, green dots indicate no late blight spores recovered at the marked locations and grey dots indicate no report.
