Quick Quiz

1. **True** or **false**: The majority of people diagnosed with melanoma are white men more than 50 years old.

2. **True** or **false**: One in five Americans will develop some form of skin cancer during his/her lifetime.

3. **True** or **false**: Skin self-checks may decrease mortality from melanoma by 63 percent.

   **Answers:** All are true statements.

What is skin cancer?

Skin cancer is the uncontrolled growth of skin cells due to DNA damage. Basal cell and squamous cell carcinoma are the most common and highly curable types of skin cancer. A third type, melanoma, causes the most deaths.

How common is skin cancer?

Skin cancer is the most common malignancy in the world. Factors such as skin type, previous history, tanning bed use, unprotected sun exposure, smoking and poor diet all contribute to increased risk. In 2014, 9,324 people (6,161 men and 3,163 women) in the U.S. died from melanomas of the skin.

How can I lower my risk?

Sunscreen is vital for helping prevent skin cancer. Check out the sun protection factor (SPF) on sunscreen bottles. Most sources recommend sunscreen with an SPF of 30 or higher. Sunscreens with a higher SPF offer more protection.

Be sure to apply plenty of sunscreen (about 1 ounce per application) and get help as needed to apply sunscreen to your back, for example. Reapply sunscreen every two hours or more often if you are swimming or perspiring.

When you purchase sunscreen, look for an expiration date. If it does not have an expiration date, label the bottle with the date of purchase and use within three years.

Follow these sun safety recommendations:
- Seek shade, especially during the midday hours from 10 a.m. to 4 p.m.
- Wear sunscreen even if you are under a protective umbrella or shady tree, or while driving in your car on a summer road trip.
- For best sun protection when outdoors, wear long-sleeved clothes and pants made from tightly woven fabric.
- Be sure to wear a wide-brimmed hat made from fabric with a tight weave to shade your eyes and protect your neck and ears.
- Wear high-quality sunglasses that protect your eyes from UV (ultraviolet)-A and UV-B rays. Exposure to UV rays is linked with macular degeneration, which is the leading cause of vision loss as we age. Cataracts (a clouding of the cornea) and skin cancer on the eyelids also are linked to unprotected exposure to sunlight.

Salmon With Mango Salsa
4 (6-ounce) salmon fillets, thawed
2 Tbsp. olive oil
1 mango, peeled, pitted, diced
1 cucumber, seeded, diced
½ c. plum tomato, seeded, chopped
¼ c. fresh cilantro leaves, chopped
2 Tbsp. lime juice
2 tsp. lime peel, grated
Pinch of cayenne pepper

Salt and pepper (to taste)

Brush salmon fillets evenly with 1 Tbsp. oil. Cook salmon according to package directions in oven or use an indoor or outdoor grill. First zest the limes, then squeeze the juice out of the remaining flesh using a juicer. For the diced ingredients, aim for about ¼-inch dice (quite small). Combine all ingredients in a small bowl; mix in 1 Tbsp. oil. Season salsa with salt and pepper. Serve salmon with mango salsa.

Makes eight servings. Each serving has 230 calories, 14 g fat, 6 g carbohydrate, and 55 mg sodium.

Roasted Sweet Potato Wedges
4 large sweet potatoes or yams, skin on, cut lengthwise into ½-inch wedges
2 Tbsp. canola oil (or other oil)
½ c. brown sugar
¼ c. walnuts
1 tsp. salt
1 tsp. curry powder (optional)

Preheat oven to 450 F. Place walnuts in a minichopper or food processor and process until ground. Mix ground walnuts, sugar, salt and curry in a small bowl. In a large bowl, toss potatoes with 2 Tbsp. oil and half of the walnut mixture. Spread potatoes evenly on a greased jelly roll pan.

Bake uncovered for 30 minutes or until golden brown and tender when pierced with a fork. Place in a serving dish and sprinkle with remaining walnut mixture.

Makes eight servings. Each serving has 130 calories, 6 g fat, 2 g protein, 18 g carbohydrate and 290 mg sodium.
