

Projected Budgets for Irrigated Crops

Central North Dakota - February 2014

Dwight Aakre, Farm Management Specialist

These crop budgets provide an estimate of cost and returns for producing various crops under irrigation. The budgets are developed for a multicounty region. Soil type and productivity, as well as weather conditions, vary considerably across the region. These budgets are intended to be used as a guide. Producers should develop their own budgets.

These budgets account for full economic opportunity costs for land, machinery and machinery housing. Labor and management costs are not included. Therefore, the bottom line represents the return to labor and management. Labor and management become the residual claimants of profit or loss and, as a result, are negative for some projected budgets.

Farm program payments (direct and counter-cyclical) are not included in this budget. These payments are tied to historic farm program base acres and payment yields, not to the current crop produced. They can be an important component of overall farm profitability but have very little impact on the selection of crops to produce or the comparative profitability of those crops. Loan deficiency payments and marketing loan gains affect crop profitability and, therefore, crop selection if the expected market price is below the loan rate. However, the projected prices are above loan for all program crops in these budgets.

Electric rates used for irrigation reflect off-peak or controlled electric rates plus demand and other charges for all crops.

Input Prices Used

Seed	Alfalfa	\$4.50/pound
	Barley	\$10.00/bushel
	Corn grain	\$3.15/1,000 seeds
	Corn silage	\$2.60/1,000 seeds
	Dry beans	\$0.90/pound
	Soybeans RR	\$0.43/1,000 seeds
Fertilizer	Spring wheat	\$12.50/bushel
	Nitrogen	\$0.45/pound
	Phosphorus	\$0.43/pound
Fuel	Potassium	\$0.40/pound
	Diesel	\$3.60/gallon
	Gasoline	\$3.60/gallon

Miscellaneous expenses include soil testing and twine. For corn silage, miscellaneous costs include custom harvesting charges.

Operating interest is charged at a 6 percent annual percentage rate for six months.

Miscellaneous overhead expenses include machinery housing and insurance, farm liability insurance, vehicle license and insurance, farm utilities, farm publications and legal fees.

Land charge is based on the U.S. Department of Agriculture's irrigated cropland rental survey less depreciation and interest on investment for irrigation equipment.

Machinery and irrigation equipment investment is calculated at 4 percent of average investment. The average investment equals (purchase price plus disposal price) divided by two.

Machinery and irrigation equipment depreciation equals (purchase price minus disposal price) divided by years of ownership.

Market yields are based on estimates of Extension agronomists assuming the use of best production management practices.

Market prices are Extension economists' estimates.

Projected Budgets for Irrigated Crops - Central North Dakota

Irrigation Investment Assumptions

Center pivot	\$80,000	Salvage value	20%
Well	\$22,000	Average years of life	20
Pump, motor and electrical	\$24,000	Total depreciation	\$114,400
Pipe	\$17,000	Average annual investment	\$ 85,800
Total investment	\$143,000		

These investment figures do not include the cost of getting electrical power to the site.

Irrigation Costs By Amount of Water Pumped
