Good morning Keith,

Would like to encourage SBARE to consider some of the needs of the Williston Research Station which is a valued producer resource in our area.

Critical needs are,

Funding for a seed cleaning facility

Permission to raise money to build a green house for pathology research and horticultural research

State support for a pulse crop breeding program at NDSU, the importance of high yielding disease resistant public varieties to keep production costs contained cannot be overstated. Pulse crops are what was keeping us going.

Thank you my friend.

Dan Kalil
