Best-in-class reporting platform	Visualize intuitive data easily for better insights and workflows.
Stay compliant	Keep up with compliance changes with easy updates.

Discover Even More Solutions with ESO

Interested in further enhancing your ESO Fire Incident capabilities?
Check out our recommended add-ons:

ACTIVITIES

Track community risk reduction efforts and organize your department with ESO Activities. Effortlessly manage programs, grants, tasks, and shift note sharing.

Learn more

ASSET MANAGEMENT

Take care of your capital assets. ESO Asset Management simplifies asset tracking. Plan, budget, and improve accountability with a full inventory catalog and cost tracking.

Learn more

CHECKLIST

Tailored to your organization's needs, simplify daily tasks and workflows with ESO Checklists. Quick, simple, and accessible from any device for task management.

Learn more

CAD INTEGRATION

Integrating with CAD allows for the transfer of incident data from the dispatch center into the ESO Fire Incident application, so your emergency response is as efficient as possible.

HYDRANTS

Record hydrant data and track maintenance and service tasks, allowing you to improve situational awareness and easily provide all the right data for ISO requirements.

Learn more

INVENTORY

With ESO Inventory, technology-enabled methods flow naturally from daily work routines to replace cumbersome mechanisms for tracking supplies.

Learn more

PERSONNEL MANAGEMENT

Personnel Management helps you manage your agency's personnel, training courses, education history and more — all from a single, easy-to-use application.

Learn more

PERMITS

ESO Permits joins forces with ESO Properties and Inspections to help you track and issue permits, record fee revenue, and ensure compliance with local ordinances.

Learn more

INSPECTIONS

ESO Inspections provides flexibility for inspections, with customizable checklists and unlimited code sets to ensure thorough data collection for safety.

CODE SETS

As the foundational blocks in the ESO Inspections module, codes checked during inspections determine compliance or violations for properties, buildings, or occupants.

Learn more

PROPERTIES

ESO Properties tracks all pre-planning aspects of today's fire service for improved operations during emergency response.

Learn more

API'S

API's give you the ability to share your data with our software, combine data from resources and access your data when you want it.
