

Projected Budgets for Irrigated Crops

Central North Dakota - February 2011

Dwight Aakre, Farm Management Specialist

These crop budgets provide an estimate of cost and returns for producing various crops under irrigation. The budgets are developed for a multicounty region. Soil type and productivity, as well as weather conditions, vary considerably across the region. These budgets are intended to be used as a guide. Producers should develop their own budgets.

These budgets account for full economic opportunity costs for land, machinery and machinery housing. Labor and management costs are not included. Therefore, the bottom line represents the return to labor and management. Labor and management become the residual claimants of profit or loss and, as a result, are negative for some projected budgets.

Farm program payments (direct and counter-cyclical) are not included in this budget. These payments are tied to historic farm program base acres and payment yields, not to the current crop produced. They can be an important component of overall farm profitability but have very little impact on the selection of crops to produce or the comparative profitability of those crops. Loan deficiency payments and marketing loan gains affect crop profitability and, therefore, crop selection if the expected market price is below the loan rate. However, the projected prices are above loan for all program crops in these budgets.

Electricity rates used for irrigation reflect off-peak or controlled electric rates plus demand and other charges for all crops.

Input Prices Used

Seed	Alfalfa	\$4.00/pound
	Barley	\$7.50/bushel
	Corn grain	\$2.56/1,000 seeds
	Corn silage	\$2.40/1,000 seeds
	Dry beans	\$0.78/pound
	Soybeans RR	\$0.33/1,000 seeds
Fertilizer	Spring wheat	\$11.00/bu
	Nitrogen	\$0.48/pound
	Phosphorous	\$0.55/pound
	Potassium	\$0.44/pound
Fuel	Diesel	\$3.00/gallon
	Gasoline	\$3.00/gallon

Miscellaneous expenses include soil testing and twine.

Operating interest is charged at a 6 percent annual percentage rate for six months.

Miscellaneous overhead expenses include machinery housing and insurance, farm liability insurance, vehicle license and insurance, farm utilities, farm publications and legal fees.

Land charge is based on the average dryland cash rental rate for the region.

Machinery and irrigation equipment investment is calculated at 6 percent of the average investment. The average investment equals (purchase price plus disposal price) divided by two.

Machinery and irrigation equipment depreciation equals (purchase price minus disposal price) divided by years of ownership.

Market yields are based on estimates of Extension agronomists assuming the use of best production management practices.

Market prices are Extension economists' estimates.

Projected Budgets for Irrigated Crops - Central North Dakota

Irrigation Investment Assumptions

Center pivot	\$63,000
Well	\$20,000
Pump, motor and electrical	\$20,000
Pipe	\$8,000
Total investment	\$111,000

Excludes cost of getting power to the site.

Irrigation Costs By Amount of Water Pumped

	Dry beans, corn and small grain			Alfalfa		
Pivot acres		125		Pivot acres		125
Inches pumped		10		Inches pumped		14
Operating hours		701		Operating hours		982
kwh/hr		55.37		kwh/hr		55.37
\$/kwh		\$0.06		\$/kwh		\$0.06
		per acre				per acre
Average annual interest cost per acre @ 6%		\$29.30				\$29.30
Depreciation cost per acre		\$39.96				\$39.96
Total ownership costs		\$69.26				\$69.26
Repairs per hour of operation	per hour	total	per acre	per hour	total	per acre
Power unit @	\$0.36	\$252.36	\$2.02	\$0.36	\$353.52	\$2.83
