

# North Dakota Tree Selector

## Spruce, Black Hills - *Picea glauca* var. *densata*

A large tree, very dense and pyramidal when young. Not as drought tolerant as Colorado (blue) spruce, but more disease tolerant than Colorado (blue) spruce. Black Hills spruce is a naturally occurring variety of white spruce (*Picea glauca*) native to South Dakota. Better adapted than white spruce which is native in the eastern United States, as far west as Minnesota. The largest Black Hills spruce tree in North Dakota is 98 feet tall with a canopy spread of 43 feet.
