

North Dakota Tree Selector

Poplar, Hybrid - *Populus hybrids*

Many hybrid clones between *Populus* species have been planted in the northern Great Plains. Most hybrids grow very fast but often lack the cold and drought hardiness of the native cottonwood. The most common parent species of these hybrids are cottonwood (*Populus deltoides*) and black poplar (*Populus nigra*). These hybrids are referred to as the *P. x euramericana* hybrids. Other species that have been crossed with cottonwood include balsam poplar, Japanese poplar and Russian poplar.

General		Growth		Ornamental		Tolerances	
Family	Salicaceae - Willow	Growth Rate	Fast	Flowers	Inconspicuous	Shade	Low
Hardiness	To Zone 3	Mature Height	>45'	Flower Color	n/a	Drought	Low
Leaves	Deciduous	Longevity	Medium	Fall Color	Yellow	Flooding	Medium
Plant Type	Tree	Power Line	No	Fruit Color	n/a
