North Dakota Tree Selector

Oak, Bur - *Quercus* macrocarpa

A large long-lived tree on good sites, with stout limbs forming a broad crown at maturity. Scrubby forms can be found on very dry sites. Native throughout all but the northwest corner of the state. Difficult to transplant because of a deep taproot. Bur Oak is also called Mossycup Oak. Once established trees grow one to two feet per year on favorable sites. The largest tree in North Dakota is 85 feet tall with a canopy spread of 61 feet.

General	
Family	Fagaceae - Beech
Hardiness	To Zone 2
Leaves	Deciduous
Plant Type	Tree

Growth		
Growth Rate	Medium	
Mature Height	>45'	
Longevity	Long	
Power Line	No	

Ornamental		
Flowers	Inconspicuous	
Flower Color	n/a	
Fall Color	Yellow	
Fruit Color	Tan,Brown	

Tolerances		
Shade	Medium	
Drought	High	
Flooding	Medium
